Poster Contest

1st Place Austin Mauro

Marketing is everything when planning an event! Where does Crooms AoIT recruit for this service? Hiring for marketing service is very costly. Why go outside of our school when we are very fortunate to have talented students who have earned industry certifications? We felt that we could use TechFest to also showcase their talent so we created the TechFest Poster Contest.

Student Life

CroomsCon: More Gaming, More Sponsors, More Charity!

CroomsCon is the annual, 13-hour charity gaming festival for Florida students in 7th through 12th grade at Crooms Academy. During this amazing one day event, Crooms Academy is transformed into a video gaming convention hall. There are classrooms filled with Xbox, PlayStation, and Nintendo consoles, over 230 PC game stations, as well as thousands of dollars in door prizes, raffles, and tournament prizes! We also host two virtual reality rooms, a Retro Room, a Dancing Room, a Party Game Room, a Rock Band on stage, and a Cosplay Contest! Over the past nine years, CroomsCon guests have raised and donated over \$44,000 to the Children's Miracle Network! This year, CroomsCon has teamed up with amazing sponsors such as Full Sail, Cool Stuff Games, EA Playtesting, and the Microsoft Store to make the event bigger and better than ever!

Robotics

This year Crooms Robotics\TSA Club has gained bright, energetic freshmen and sophomores who are excited and enthusiastic. We also have our veteran Juniors, who have been in the club since their freshman year. We will be competing at state-level competitions for robotics, design, coding, debate, video, and many other subjects. Their passion will show through their products and continue to build through their new bonds in the community. The plan for next year is to become involved at the local level to encourage growth in personal and team experiences.

With much more knowledge to learn and memories to make, we hope the journey for Crooms' Robotics\TSA Club will be bright going into the future.

The truth is,
you need Veritas.

We lead you from chaos to clarity on the path to multi-cloud data management. Welcome to the truth in information.

VERITAS

- Multi-Cloud**
Data protection and availability across leading cloud platforms.
- OpenStack**
Enterprise performance for Mode 1 applications on OpenStack.
- Software-Defined Storage**
Greater flexibility and choice, better economics and enterprise-class service levels.
- GDPR**
Enterprise-ready compliance to jumpstart readiness and accelerate transformation.

Why TechFest at Crooms AolT?

As a Sponsor...

- Access to Seminole County Schools best and brightest young technical minds
- Access to the parents of our technically-gifted youth
- Opportunity to meet other businesses and technology vendors
- Opportunity to create new business at a unique showcase
- Opportunity to meet an innovative high school team

As a Student...

- Opportunity to meet potential future employers and explore career options
- Opportunity to explore local educational options
- Opportunity to see some of the latest technology
- Opportunity to hear from the "experts" in various career fields

As an Educational Institution...

- Access to gifted young technical minds close to post-secondary status
- Opportunity to evaluate students showcasing their abilities
- Opportunity to recruit future college students

All proceeds fund...

- Career and college related programs/activities
- Job shadowing and internship opportunities
- Curriculum needs
- Scholarships to Crooms graduates – recipients will be presented at the Awards Ceremony in April

The last 13 years, TechFest has raised over

\$275K

Thank you, stakeholders, for all your support!

How to Accidentally End Up Doing Everything You Ever Wanted to Do

Kunal Patel, *BrandXR*

In the world of technology sometimes something as simple as showing up can lead to serendipity or happy accidents that can create life changing opportunities and events.

Kunal Patel is an Orlando tech leader and serial entrepreneur with over 15 years of experience in roles spanning leadership, software development, sales and creative partnerships. He serves as co-founder and CTO of brandXR, a VR & AR & Immersive content creation platform for driving sales, marketing, education, and business goals, which in 2017 won Most Innovative technology by the Orlando Business Journal. Kunal is a firm believer in not waiting for something great to simply happen to you, but rather taking action and creating your own luck. Over the past few years he's led the charge on creating jobs, business and serendipitous opportunities within the gaming and technology industries. He is a 2017 40 under 40 Award Winner from the Orlando Business Journal for his numerous industry initiatives.

Get Certified with Certifications in the Tech World

Matthew A Ruxton
AllPoint POS

A+, Network+, CMNO, CMNA, SFDC and more! The tech world loves its acronyms and certifications! Join me where I'll explain what certifications are out there, when you need them, and when to get started discovering what you want to do. Q+A Session available - Crooms AOIT Alumni.

How to Pick the Best Computer and IT Degree Program for You

Bill Gaught
Seminole State College

This presentation targets students who have an interest in pursuing a college degree in computers or information technology. The various types of associate and bachelor's degrees offered in Central Florida will be discussed so students can make informed decisions regarding the best college degree for them.

How the Boeing 737 Max Disaster Looks to a Software Developer

John Marra
Siemens

Modern aircraft are heavily reliant on software for critical features such as flight control. This presentation explores what went wrong in the design process that caused two crashes and killed 346 people..

Me? A Business Owner?

Pam Hargis
FocalPoint International Coaching

Do you have great ideas or a product/ service that would benefit others? Have you dreamed of joining millions of others in owning a business? Does the idea of working for yourself, and being your own boss excite you? If you answered YES to one or more of these questions, then "Me? A Business Owner?" is the TechFest XIV Workshop you won't want to miss! This high-energy, high-participation session provides eager participants realistic tips and techniques to discovering if business ownership is the right path to take now or in the future. Learn proven steps to implement immediately that will guide you towards entrepreneurship success

From Warehouse Worker to IT Business Owner

Muntasir Manji
Tech-U-There

This presentation will talk about how I went from a warehouse worker to an owner of an IT company. It will also talk about the steps taken and lessons learned.

Maps, GIS, and Our Community

Jose Manuel Salas
Seminole County Public Works

Everyday thousands of public employees work with maps to improve the quality of life for Seminole County residents. Using geographic information systems, (GIS) Seminole County is able to provide emergency services, manage infrastructure, support conservation, and much more! This session will offer students a chance to see some of the different types of map and mapping applications being used throughout our community.

Is Elon Perfecting Technology on Earth for Use on Mars?

Eric Violland
AAA

In this lighthearted presentation, we'll explore companies such as Tesla, SpaceX and The Boring company to see how the work Elon Musk is doing can one day allow for humans to inhabit Mars.

The 2020 Census Count - Why It Matters

Lakshmi Sankaran & Tony Matthews
Seminole County Government

Beginning in March 2020, households in America will begin receiving an invitation from the U.S. Census Bureau to participate in the 2020 Census. Residents will have the option of responding by computer or mobile device, or by telephone. Preparation however, began two years ago with the County helping to clarify every eligible address using GIS (Geographic Information Systems). Counting those who do not respond is a challenge. See how important data is to the census count, how important responses to the count are, and how the census results affect our future.

What Happens on Social Media Stays on Social Media

Dawn Jensen
Virtual Options

Learn how to build your professional presence online and why it matters for college applications and your first job.

Do You Know Where All of Your Data Are Going?

Patrick Kelly and Ryan Peetz
Seminole County Public Schools

Come learn about some of the latest cyber threats and ways in which you can protect your data from falling into the wrong hands.

Workshops

How to Get and Keep a Job with the Power of Soft Skills

Daniel Bickford

JDR Property Enrichment and Redevelopment Co.

Do you know what it takes to get and keep a job? Even the smartest person can get fired from a job if they say the wrong thing to the right (or wrong) person. Learn some of the right and wrong things to say to an interviewer, a boss, and even coworkers. We will discuss things like greetings, conversation skills, appropriate humor, appropriate language and more.

IT Project Management: Project Manager is King

Renee Overton-Palma

The Palma Project

Software Development, Engineering, Infrastructure and more! Technology projects are everywhere and the Project Manager is KING! Are you prepared to: (1) kick a project off successfully, (2) keep moving without supervision, (3) combat things like procrastination, (4) visualize/anticipate/analyze tasks and finally (5) get a project team to the finish line? Students will struggle to meet deadlines and to find ways through what feels like chaos. Learning how to break apart tasks, chart your progress and begin to see work differently starts here with a little PM Magic! Get introduced to skills that can help you navigate your life and your future career.

The Future of Intelligent Learning Technologies: Promises and Challenges

Dr. Roger Azevedo

UCF

This presentation focuses on the use of intelligent learning technologies that adapt to individual student's needs during learning, reasoning, and problem solving. I will focus on describing interdisciplinary methods used to make current (e.g., serious games augmented reality) and future (e.g., intelligent virtual humans) learning technologies intelligent to support student learning across STEM and non-STEM disciplines.

Communicating in the World

Krissi Clapper

Finastra

In this workshop, I will go through some important nonverbal and social skills that everyone should know in order to be a better communicator. These skills include listening, body language, eye contact, space, voice and so on. I will take the knowledge that I learned while studying Human Communication at the University of Central Florida and bring it to the classroom for these students. We communicate with someone daily whether that is in person or via a cell phone; knowing the do's and don'ts can help out tremendously.

Pathway to a Career in Cybersecurity

Ken Richmond

Seminole County Public Schools

Stop spinning your wheels. A data-driven approach to identifying cybersecurity career opportunities, collecting skills required for those careers, and the necessary career path to get there.

Becoming a Professional Gamer

Seldon Polczynski

Team Fish Taco

As of late, Esports, YouTube, and streaming have become very lucrative professions. Have you wondered how to break into the scene? In this workshop we will review the different strategies that will maximize your chances of success.

Student Virtual Wallet - High Tech Money Management

Nate Melton

PNC Bank

Discussion of basic money management principles utilizing the demo of the PNC Student Virtual Wallet with focus on the high tech tools that facilitate monitoring of spending, budgeting, short & long-term goal setting, electronic transfer of funds, bill pay and calendar management.

Design Thinking for Innovation

Shelley Armstrong

Finastra

Design Thinking is a process that has been used for decades to create better products, services, experiences, keeping people's needs at the core. This introduction is meant to give you the tools to use design thinking methodologies to solve problems together more creatively, with greater empathy, and have fun while you are at it!

Future Avionics Technicians

Natasha Gadea

Avionics Technician Association

Our hands-on program provides the practical knowledge in students to troubleshoot and work in all electrical systems in an aircraft. The student will gain the knowledge of wiring, installing, and the correct usage of tools in the aviation industry. In addition, the student will have the opportunity to develop soldering skills using NASA and FAA standards techniques. Avionics USA as part of UCF continuing education program is committed to train and prepare technicians for the future.

Workshops

Communicate for Success

Brian C White
Veritas

Communicating for Success is the fastest way to achieve excellence. When people learn to communicate effectively, there are more opportunities for success and happiness.

Legal Hustle: Mental Health is Key to Success in Business

Pernell Bush
K.E.Y Counseling Solutions

This workshop introduces young adults to the nature of business and entrepreneurship as a vehicle for making money by creating wealth and producing goods and services for a profit in a free enterprise economy. Emphasis is on different forms of business organizations, including sole proprietorships, partnerships, corporations, joint ventures and not-for-profit enterprises. Youth will learn how to identify, assess and develop a business plan as well as how to find and evaluate business opportunities. The attendees will also gain understanding of the importance of taking care of their mental health to achieve the success they desire.

The Dangers of Social Media and Online Predators

Special Agent Kevin Kaufman
FBI

The presentation will focus on the dangers of social media and the consequences of posting too much online. This presentation will open your eyes to the dangerous predators that are out to get you through grooming and enticement techniques.

Healthcare Needs More Hackers

Anna Menis, Michael Schmidt and
John Wawrzaszek
Orlando Health

Learn why the future of healthcare requires finding creative and innovative solutions to address our biggest challenges. From technology that monitors blood loss in surgery, to securing millions of medical records, to apps that assess a newborn baby's health – healthcare needs more hackers to develop the solutions for tomorrow. Hear from Innovation and IT leaders on how we do it here at Orlando Health.

Bounce Back Like a Boss

Thank You

Dr. Walt Griffin, *Superintendent*

Crooms Academy of Information Technology (AOIT) continues to operate on the leading edge of public education. The mission of Crooms AOIT is to provide innovative teaching and learning in a technology-enriched environment and to engage students in an academically challenging curriculum that prepares them for post-secondary education with industry validated technology skills. No one does that better than the teachers and administrators at Crooms AOIT!

The school received national recognition in 2013 when it was rated the #1 Connected High School in the United States by US News and World Report, and the accolades have continued to roll in since then! Crooms AOIT and its students have received numerous honors recently, including:

Designation by NAF (National Academy Foundation) as a Distinguished Academy for the 10th year in a row. Just 55 schools in the United States earned this honor last year.

Selection by the Magnet Schools of America as a 2018 Merit School of Excellence, MSA's highest and most prestigious recognition.

Award-winning performance in STEM-related competitions, including Science, Engineering, Communication, Mathematics, and Enrichment (SECME), Business Professionals of America (BPA), and regional and state science fairs.

Even more important than all of these accolades, I am very proud of the school's commitment to a world-class education for all of its students. In 2019, Crooms AOIT achieved a 100% graduation rate. Performance at this level requires herculean efforts by the faculty, staff, and community to ensure that students have the support they need to meet the high standards for graduation from Crooms AOIT.

One of the premier benefits of attending Crooms AOIT is the opportunity to complete high school with one or more nationally recognized industry certifications. In 2019-20, Crooms AOIT students earned professional credentials in Microsoft Office, Adobe Creative Suite including Photoshop, Flash, Premiere Pro, Illustrator, and InDesign, Cisco Certified Network Associate, CompTIA A+, and Microsoft Technology Associate--Windows Operating System Fundamentals. All of these credentials serve as evidence of the advanced skills that graduates of Crooms AOIT take with them to college and the workplace.

Crooms AOIT and Seminole State College continue to maintain a strong partnership, providing dual enrollment (college credit) opportunities beginning as early as the 9th grade. This year marks the fourth cohort of Crooms AOIT students completing their Associate in Arts degree from Seminole State College while still in high school. This program saves families thousands of dollars in tuition and fees. In addition to dual enrollment, Crooms AOIT continues to offer a rigorous Advanced Placement (AP) Program that provides students with the opportunity to take college level courses and earn college credit through the College Board AP Testing Program.

Crooms AOIT is also a recognized leader in providing students with mentors from the business community and internships with local employers. These work experiences give students the opportunity to apply the skills they learn in the classroom to challenging situations in the world of work. These opportunities are made possible by the strong Business Advisory Council that supports the school and by the dedicated and focused work of Principal, Dr. Brandon Hanshaw.

I sincerely appreciate your commitment to TechFest XIV, which has become a great tradition at this school. Seminole County Public Schools values your partnership with Crooms AOIT; by sharing your time and expertise, you are ensuring the growth of a strong talent pipeline in our vibrant community.

Kate Crockett, *Fundraising Committee Chair*

On behalf of the Crooms Academy Business Advisory Council, thank you for your participation and generous sponsorships in support of Crooms TechFest XIV. This event is a success year over year because of amazing sponsors and speakers like you and your company. It is always encouraging to see a group, as diverse as this, come together for such a worthy cause. This year we reached our goal of raising over \$30,000! Because of the hard work from the BAC, staff, faculty, ambassadors, speakers and sponsors, we will be able to provide many scholarships,

internships and curriculum support. Perhaps most exciting, we are all a part of preparing these students for success. As the fundraising chair for TechFest this year, I want to thank the entire Crooms TechFest team for your enthusiasm and support. Next year we will continue our journey together to reach the Crooms 100! We hope to see everyone next year, again thank you for your dedication and commitment; you are truly making a difference in providing

“The Future of IT: The Students of Tomorrow”.

Dr. Brandon Hanshaw, *Principal*

I would like to personally welcome members of the Crooms Academy of Information Technology Business Advisory Council, Central Florida leaders in business and industry, representatives from post-secondary institutions, community members, and Crooms AOIT Alumni to our annual TechFest Event.

Talent in computer science and information technology continues to be in high demand and the technology curriculum at Crooms Academy of Information Technology enables students to specialize in networking, programming, gaming, modeling and simulation, computer repair, digital media, and cyber security to address these industry needs.

Crooms Academy of Information Technology continues to deliver a high quality education for our students which includes a strong core academic curriculum and mastery learning in a range of information technology program strands. The TechFest student conference is a critical element of our program as the event directly connects our students to business professionals and higher learning institutions which strengthens the workforce readiness pipeline and the partnership between industry and education.

Your investment in Tech Fest is an investment in our students. I would like to thank you for your partnership and continued support of Crooms Academy of Information Technology.
